INFORMED CONSENT

I understand that, as with any health care procedures, there are certain complications which may arise during a Chiropractic treatment. Those complications include, but are not limited to; fractures, disc injuries, dislocations, muscle strain, Homer's Syndrome, diaphragmatic paralysis, cervical myelopathy and costovertebral strains and separations. Some types of manipulation of the neck have been associated with injuries to the arteries in the neck, leading to, or contributing to serious complications including stroke. I do not expect the doctor to be able to anticipate all risks and complications, and I wish to rely on the doctor to exercise judgment during the course of the procedures which the doctor feels at the time, based upon the facts then known, are in my best interest.

I have had an opportunity to discuss with the doctor named below and/or with office personnel the nature, purpose and risks of Chiropractic adjustments and other recommended procedures and have had my questions answered to my satisfaction. I understand that the results are not guaranteed.

I have read **(initial ___)** or have had read to me (initial_____ the above explanation of the Chiropractic adjustment and related treatment.

By signing below, I state that I have weighed the risks involved in undergoing treatment and have myself decided that it is in my best interest to undergo the Chiropractic treatment recommended. Having been informed of the risks, I hereby give my consent to that treatment. I intend this consent form to cover the entire course of treatment for my present condition and for any future conditions for which I seek treatment.

I understand that Georgia Advanced Healthcare can use an open room adjusting approach. If this approach is unfavorable or undesirable to me, I understand that private rooms will be available upon request.
